DETAILED ACTION

1. Claims 1-16 and 21-46 are presented for examination.

Information Disclosure Statement

2. IDS submitted on 6/8/2009 is considered.

Reissue Applications

3. Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 5,999,977 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

Response to Arguments

4. Applicant's arguments, see remark, filed 7/28/2009, with respect to the rejection(s) of claim(s) 1-16 and 21-46 under 35 USC 251 being improperly broadened outside the two-year period and defective declaration have been fully considered and are persuasive. Therefore, the

Art Unit: 2452

rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

Reissue Applications

5. Claims 16 and 21-46 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Improper recapture of surrendered limitation were found in claims 16 and 21-46. Claims 16 and 21-46 either broadened or omitted the surrendered claim limitation of “terminating said broadcast of said data and said multicast communication channel if at least two of said plurality of second endpoints do not transmit said acknowledgement messages containing a positive acknowledgement”. This specific limitation was argued in the 12/28/1998 remark in page 2 to obviate a rejection in the patent (Patent Number 5,999,977). Emphasis was made in said

Art Unit: 2452

arguments to show the distinction and novelty of having "at least two of said plurality of second endpoints" for transmitting acknowledgement messages. See MPEP 1412.02

Double Patenting

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

7. A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

8. Claims 1-15 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-15 of prior U.S. Patent No. RE40704. This is a double patenting rejection.

Conclusion

9. A shortened statutory period for reply to this Office action is set to expire **Three MONTHS** from the mailing date of this action.
